

The International Society for Prosthetics and Orthotics (ISPO)

The ISPO-Sweden National Member Society's prize for Bachelor-level thesis for the academic year of 2021-2022 is awarded to:

Developing and Testing the Usability of a Communication Tool to enhance Evidence into Practice

By: Rikke Rasmussen & Nikolaj E. Hansen

Motivation:

The winning thesis was well-executed on a well-established scientific foundation and showed the authors' ability to work with and implement multiple methods, each of them requiring dedication and time to understand and execute. The thesis is well within the scope of ISPO and would be of interest to multiple professional groups, both from an evidence-based perspective and a methodological one.

We wish to acknowledge the authors on creating a work that implements a method of a wider interest and shows how this can specifically be implemented in the P&O field.

ISPO-Sweden Board
